

# ANTEC GUN CLOTH

## Lint-free gun cloth – for the meticulous barrel cleaning of all small arms, tanks and larger guns

### Superior lint-free cleaning

Antec gun cloth is suitable for use across all three services - where meticulous and virtually lint-free cleaning is important – from the largest to the smallest bores. It is also ideal for a host of other demanding tasks where exceptional cleaning and a lint-free surface is required - e.g. night vision, sights, optical equipment, engine rebuilds, polishing, etc.

It is manufactured using a patented hydro-entanglement process which produces a high quality spun-laced fabric which gives a virtually lint-free result under the harshest of conditions. It is able to withstand many harsh solvents, oils and liquids - its finely apertured surface efficiently entraps dirt and residue - with very high absorption and a very high resistance to abrasion or scuffing.

# ANTEC GUN CLOTH

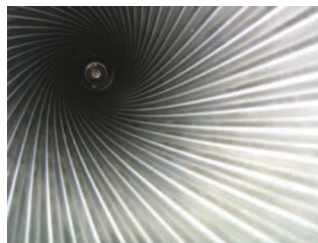

## OLD vs NEW

### Still using this?

Traditional cleaning methods now surpassed by superior technology for the modern military

**Antec Gun Cloth is ideal for barrel cleaning and many other lint-free requirements**

### Instead of this?

- **Highly absorbent** – copes with the dirtiest jobs
- **Superior lint-free wiping** – does not leave fibres behind
- **Excellent at entrapping dirt** or residue in its apertured surface
- **Quality is 100% consistent** – always clean – (no risk of foreign bodies, zips or buttons to cause scratching etc.)
- **Does not break down** in strong solvents, harsh liquids, fuels etc.
- **Highly resistant to abrasion** and scuffing
- **Excellent at polishing** and buffing
